1. Comment. The volume of incoming supply shipments at the GSFG food ration supply depot in Satskorn amounted to 210 carloads and, thus, during the third quarter of 1954 is below the average volume. The average volume amounted to 290 carloads. The rate of shipments coming directly from the USSR was 122 carloads. The cereals from the food factories in Riesa and Wurzen were also produced from grain imported from the USSR. Poor ration shipments from the zone, except for salt, were low.
